Review of Innovative Thinking Grant Proposal/Math 093-094
Nicole and Darlene presented their proposal for a developmental math innovative thinking grant to develop a teaching community. They noted that several additional math instructors have committed to participating in the learning community and all the MATH 093 and 094 courses taught by the participating instructors will be part of the project. The ultimate goal is to implement this for all of the 093 and 094 sections, involve part-time instructors, and modify course materials as needed to ensure student success. Questions were raised about the evaluation and measurement of student learning and the need for more specific objectives for student learning and how it will impact success for subsequent courses. Nicole and Darlene agreed to submit a revised proposal for review by Cabinet at next week’s meeting.

A draft of our top three will be shared with Mike Hansen before the final submission to MCCA.
