

Orofacial Myology

A program that evaluates and treats a variety of oral and facial muscle postural and functional disorders. Addresses oral habits that may be causing dental malocclusions or disrupting normal dental development. Connects solutions to oral problems seen by speech pathologists, dentists, orthodontists, and the medical field.

Other terms used to describe this type of therapy/treatment:

- Tongue-Thrust Therapy
- Myofunctional Therapy
- Oral Myofunctional Therapy
- Orofacial Myology Therapy
